WORK EXPERIENCE

Full-Stack Web Developer, RTA (Rezekne Academy of Technologies), Rēzekne
Dec 2022 - Jun 2023

Mentorship Program (6 months)

- Assisted students in developing senior projects, averaging 4 hours/day.
- Developed and deployed a user-friendly website and API hosted on Pinterest.io using Docker containers.
- The site provides comprehensive details about every room at RTA, including location, status (in use, available, inactive), and schedules for active rooms.

IT Essentials: PC Hardware and Software, Cisco
Jan 2021

PROJECT

Home Website "Garkalni"
Is the website for a fast-growing small business, based on ReactJs.

Link: https://taskansarmands.com/case/Garkalni

E-commerce website "Apdrukys studeja"
An e-commerce website has been developed to enable the company to efficiently manage and sell a variety of products, including standard T-shirts, mugs, printing services, and customizable T-shirts and mugs

Link: https://taskansarmands.com/case/Apdrukys-studeja

Additionally, a custom Order Management System (OMS) was created to streamline the process of managing orders.

Home Website Daina Catering

Daina Catering is a modern website for a catering company, designed with a focus on visual appeal, clear information structure, and intuitive navigation. The goal of the project was to create an elegant digital experience where customers can easily explore the services offered and get a clear overview of the company’s offerings.
